

Award Winning Parental Controls Software

For over a decade, CyberPatrol has helped keep families safe online. As the use of the Internet has expanded, so has the exposure to undesirable web sites and the hidden dangers in chat rooms, e-mails and other Internet based programs and tools. The US Department of Justice reports that in a 12 month period 20 percent of kids surveyed received a sexual approach online.

Access to the Internet can introduce new dangers and content that can negatively affect your family, school or business, and PC. CyberPatrol is specifically designed to help combat these threats and create a safe online environment. It's never been more important to make sure families are protected and there's no better way to do that than with CyberPatrol Parental Controls Software.

CyberPatrol Gives You Complete Control of Online Activity

Whether it's shielding users from undesirable web sites or managing the amount of time users are online, CyberPatrol's easy to use control panel gives you complete control of online activity.

It is easy to use, yet technically sophisticated and fully customizable. CyberPatrol is a perfect solution for novices seeking an out-of-the-box solution with pre-set controls. At the same time it has all the flexibility and capability required by power users looking to customize Internet access for each user. CyberPatrol's powerful Internet filtering and parental controls software makes it easy.

CyberPatrol has won numerous awards and is recommended regularly by parent and computer magazines.

- Protect an unlimited number of users per PC
- Block harmful websites and images
- Restrict chat and instant messaging
- Block downloads of games, music, images and videos
- Limit or prevent access to programs
- Protect against revealing personal information online
- Stop inappropriate language in chat & IM sessions
- Protect against online predators and identity thieves
- Manage time spent online or using programs
- Monitor Internet activity
- Customize filtering for each user

Protects Up to 3 PCs

CyberPatrol Parental Controls 7.7 includes protection for up to 3 computers, assuring that all computers used by a family are being protected.

CyberPatrol Parental Controls Features

Protect Your Entire Family

CyberPatrol is licensed for up to 3 personal computers so that you can protect all the computers in your home for one affordable price. There is no limit to the number of users you can protect on each PC.

Powerful Filtering Technologies

CyberPatrol's powerful filtering capabilities help protect against harmful Internet content by blocking unsuitable websites, content and images.

Flexible Filtering Options

Use CyberPatrol's 'ready-to-go' filtering, or customize for each user. You can fine-tune the filtering by choosing to allow or block specific sites, or sites that contain specific words in their web address.

Limit Access to Programs

CyberPatrol lets you restrict access to specific programs on your PC, like chat, instant messaging and games; or block access to 'off-limits' programs like home finance packages.

Restrict Chat & Instant Messaging

Chat and instant messaging programs are a great way to talk to friends or even make new ones, but you need to safeguard against online predators and prevent personal information from being revealed.

Control Program Downloads

Downloading programs from the Internet is an increasing security nightmare. Stop indiscriminate downloads by locking down your PC to eliminate the worry.

System Requirements

CyberPatrol is designed for Windows-based standalone PCs. It's also used for small networks of server-based PCs, by installing and licensing CyberPatrol on each PC to be filtered.

Microsoft® Operating System: Windows® Vista SP1 +, Windows® XP Home Edition SP2 * +, Windows® XP Professional SP2 * +, Windows® 2000 Professional SP3 +

Processor: Pentium II or higher

Memory: 256 MB minimum

Disk space: 30 MB

Internet Browsers: Microsoft® Internet Explorer 5.01 SP3 and above, Mozilla Firefox 1.0 and above, AOL 8.0 and AOL 9.0, Netscape 6.0 and above.

* Compatible with Windows XP Service Pack 3.

Notes:

- We recommend you have the latest Microsoft® security patches installed.
- Support is only for 32-bit operating systems. A valid Internet connection is required.

Create a Pre-Approved List of Sites

CyberPatrol lets you restrict surfing to a pre-approved 'Yes List' of sites that you select. It's easy to create, and puts the control in your hands.

Flexible User Profiles

Manage Internet access for any number of users on a PC. CyberPatrol is easily integrated with existing user names in Windows XP and Vista.

Monitor Internet Activity

Monitoring and reporting is an important part of taking control of Internet access. CyberPatrol provides detailed reports of each user's Internet activity.

Limit Time Online

Time management ends the frustration of not knowing how long a user has been online, or whether they've been using specific programs like games. You can easily set limits based on time of day, or length of time.

Protect Your Personal Information

Protecting personal information is a critical concern on the Internet. Help safeguard against predators and identity thieves by stopping users from revealing personal information online, and blocking access to malicious websites.

Free Updates, Upgrades, Support

Your CyberPatrol subscription entitles you to free automatic list updates, product upgrades, and helpful online customer support.
