

Keep Employees Focused On Work and Away from Objectionable Web Sites

The Internet is a business tool that no one can do without. Yet with all its information and efficiencies come new risks and vulnerabilities. Surfing the Internet, shopping online and playing games at work can impact productivity. And when employees engage in illegal Web activity during work hours and on company-owned computers they put your business and reputation at risk. SiteSURV eliminates risks and helps increase productivity in just minutes.

SiteSURV Worry Free Web Filtering

SiteSURV is a managed service offered by CyberPatrol that works in the background to filter internet access from all computers sharing a common access point. Because it is a service, there is no software to install and nothing you need to manage. Simply set it up and forget it. There are no lists to maintain or monitor. SiteSURV does all the work and CyberPatrol manages all the updates.

Set Up Takes Just Minutes

Start protecting your business with SiteSURV in just minutes. There's nothing to install on your computers. Follow a few simple steps to change your DNS and you're finished. SiteSURV immediately begins actively blocking objectionable content and malware distribution sites. If you need help, just contact CyberPatrol's Technical Support group and we'll walk you through the process.

Works with PCs and MACs

Since SiteSURV is a managed service that uses the Internet, it works with any computer regardless of the kind of operating system. There's no need to worry about software versions or browser types. SiteSURV works with them all.

We Guarantee It

SiteSURV comes complete with a 30 day Money Back Guarantee. If you are not satisfied with SiteSURV after 30 days, we'll cancel your subscription and give you a complete refund.
