Harrisburg, PA – April 14, 2009 – CyberPatrol, a leading developer of web filtering solutions for families, educators and small and medium sized businesses (SMBs), today announced a partnership with Tech Data Corporation (NASDAQ GS: TECD). This leading IT products distributor will offer its nationwide network of tens of thousands of IT reseller customers access to CyberPatrol software.

Tech Data offers resellers access to one of the channel's broadest solutions offerings, encompassing software, systems, peripherals, networking and high-end data center solutions from industry leading vendors. Its wide array of value-added services—designed to help resellers grow their businesses—include extensive credit and lending resources, technical training, custom configuration and best-in-class e-business tools. For software resellers, Tech Data offers specialized, dedicated support, including its software licensing desk; online licensing tool LION; the automated software licensing retrieval tool MyLicenseTracker™; and software license renewal tracking through MyLeadTracker™.

“CyberPatrol's web filtering products, especially SiteSURV and SiteSURVplus, meet a growing need for easy-to-use, effective security solutions at a very competitive price,” said Tech Data Vice President, Software Product Marketing Stacy Nethercoat. “Resellers serving SMBs and the public sector will find CyberPatrol's solutions very compelling options when deploying comprehensive security solutions for their customers.”

CyberPatrol's range of products for consumer, SMBs and schools and libraries are built on the proprietary SiteCAT platform, a unique content filtering engine that continuously filters the web for inappropriate content. The products include CyberPatrol Parental Controls software for the home, educational, and small business market, and SiteSURV and SiteSURVplus web filtering services that operate in the cloud and on the network. CyberPatrol products are specifically designed to help home, educational, and business computer users to manage Internet access.

“Tech Data is an important addition to CyberPatrol's channel distribution program,” said John Sancin, CEO and president of CyberPatrol. “This leading distributor's extensive relationships with resellers and retailers will enable CyberPatrol to offer our award winning consumer and business web filtering products to more families and business owners searching for an effective method to enhance their security, safety and productivity. Tech Data's creative financing services and extensive support for software resellers are particularly attractive for our channel partners.”

About CyberPatrol, LLC

CyberPatrol is a pioneer and leader in the web filtering market. Launched in 1995, CyberPatrol is specifically developed for ease of use to help protect families and businesses from undesirable or threatening online activity.

In 2008, a group of private investors acquired CyberPatrol. Under the direction of a successful, seasoned executive management team, CyberPatrol then acquired Emerald Technology, Inc. in June of 2008. As part of this acquisition, CyberPatrol acquired SiteCAT, the core technology behind all of CyberPatrol's world class filtering products. These products include CyberPatrol Parental Controls, SiteSURV and SiteSURV*plus*. These cost-effective products are easily implemented and enable businesses to manage employees' Internet access.

CyberPatrol is recommended regularly as the product of choice for online safety by many parent and computer magazines. Its award-winning software is relied upon and trusted by parents, schools, libraries and businesses around the world to monitor and manage their users' Internet access, while providing them with the freedom and safety to explore. CyberPatrol offers a free tool called Threat Detector that scans PCs for risky surfing habits. Try it today: <http://www.cyberpatrol.com/ThreatDetector/scan.asp>
